

The National Action Network
African American Cultural Center (Us) and
Southern Christian Leadership Conference—Los Angeles
present

*"Of all the forms of inequality,
injustice in health care is the
most shocking and inhumane."*

— Martin Luther King Jr.

On July 13, the White House unveiled the National AIDS Strategy. In conjunction with the release, President Barack Obama mandated that the various Executive Branch departments involved report to him within the next 150 days (December 9, 2010) outlining the steps they will take to implement the Strategy. Come give your input and recommendations to ensure that the National AIDS Strategy addresses the needs of the African American community. Your participation is critically important to ensure the Black community's voice is heard.
